# General Waste & His Waste Invaders.®

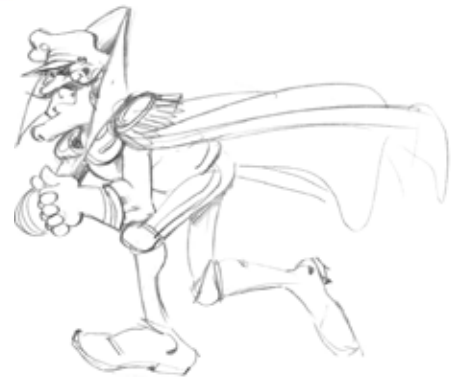

**GENERAL WASTE®**  
Notes from sketch illustrations  
and design direction:

*General Waste could be from Nuke's planet and the reason why Nuke came to earth and joined Captain Energy (in search of General Waste). That could explain, as well, General Waste's bizarre creatures that compose the Waste Invader Force.*

*However, General Waste would be first and foremost Captain Energy's problem, not allowing Nuke to take a more dominant position than Captain Energy.*

*Being an outlaw on his planet, General Waste has fled to earth to hide from Nuke or justice or whatever. On his way to earth, he passed through a time warp, which put him on earth, but in prehistoric times.*
